2	0.25	Natrosol™ 250 HHR CS	Hydroxyethylcellulose	Ashland	Rheology Modifier
3	5.00	Vycerin	Glycerin	Vantage™	Humectant
3	5.00	Dehyquart® A-CA	Cetrimonium Chloride	BASF	Conditioning Agent
3	2.00	Genamin® BTLF	Behentrimonium Chloride	Clariant	Conditioning Agent
4	4.00	Biobase® S	Glyceryl Stearate, Sodium Stearoyl Lactylate, Cetearyl Alcohol	Tri-K	Emulsifier
4	2.00	Lipocol™ SC Pastilles	Cetearyl Alcohol	Vantage™	Stabilizer
4	10.00	Liponate™ CCC MB	Coco-Caprylate/Caprates	Vantage™	Emollient
5	1.00	Euxyl® PE 900	Phenoxyethanol (and) Ethylhexylglycerin	Schulke	Preservative
5	10.00	Coconut-Avocado Hair Milk	Water (and) Cocos Nucifera (Coconut) Oil (and) Persea Gratissima (Avocado) Oil (and) Propanediol (and) Glyceryl Stearate (and) Phospholipids (and) Cocos Nucifera (Coconut) Liquid Endosperm (and) Cocos Nucifera (Coconut) Fruit Juice (and) Polyglyceryl-10 Oleate (and) Polyglyceryl-10 Dioleate (and) Cetearyl Alcohol (and) Sodium Stearoyl Lactylate (and) Glycerin	Vantage™	Emollient/ Hydration Booster

Procedure:

1. Add Phase 1 to main vessel and begin propeller mixing. Heat to 75°C. Mix until uniform.
2. Sprinkle in Phase 2 ingredient and mix until uniform.
3. Add Phase 3 ingredients one at time in the order listed. Mix until uniform.
4. Premix Phase 4 ingredients in a side vessel. Heat to 75°C. Add to main vessel and mix until uniform.
5. Begin cooling batch. At 40°C add Phase 5 ingredients. Mix until uniform.
6. Cool batch to 30°C.

Stability: 4 weeks (F/T, 45°C, 25°C)
