you covered.**

Vantage® iSAP™ 311 Inhibited Surface Adhesion Promoter

Ready-to-use aircraft pretreatment containing corrosion inhibitors

iSAP 311 Inhibited Surface Adhesion Promoter from Vantage prepares and protects aircraft surfaces prior to painting. Engineered to replace chromated conversion coatings and other uninhibited pretreatments and adhesion promoters, iSAP 311 has also been tested for broad spectrum materials compatibility, adhesion promotion and corrosion resistance in both chromated and non-chromated paint system stackups.

Environmental, Health & Safety Benefits

Non-Flammable

Non-Hazardous

Low VOCs

Features and Benefits

- Protects against corrosion
- Chrome-free
- Effective with both chrome and non-chrome primers
- Suitable for use on composite and metallic structures
- Tested to aerospace standards
